

Phase 1: Memorizing

(per session, append-only)

Session 1

Session 2

Session 3

...

↓ Extract facts
(thinking LLM)

Append-only Fact List (~1600 facts)

Structure
(thinking LLM)

Phase 2: Structuring

(periodic, from all facts)

Typed state modules (Code)

Constraint execution -> ACTIVE_ALERTS

Archive (ChromaDB)

Raw conversation chunks + fact vectors

Multi-Strategy Retrieval

Code + Facts + Archive → Answer

Manifest: Domains + ACTIVE_ALERTS

Always in agent context (~300 tokens)
